

In May of 2001 I became a patient of Dr. Maloof. I had been suffering for about three years from migraine headaches that were lasting an average of four days each. No medication could do more than barely take the edge off the pain, and for the most part it reduced me to a nonfunctional state. When the headaches started, they came about once per month, then became more frequent, about once per week. I was under the care of another chiropractor for about 9 years prior to Doctor Maloof, but it seemed to have no effect on my migraines. Dr. Maloof took some x-rays of my neck and found a misalignment of my atlas. He felt that it was the bulk of the problem and could have been the result of a car accident eight years prior. I was totally surprised at how delicate and precise his adjustment was with the Atlas Orthogonal instrument. There was absolutely none of the pain that I had associated with previous chiropractic adjustments. After the first adjustment, my shoulders began to feel much less tight and my headaches quickly became manageable and shorter in duration, to the point where my use of medication is only occasional. I have gotten to the point where my adjustments are holding for long periods of time. I feel the most important part of my success in dealing with my migraines is coming to see Dr. Maloof regularly for maintenance treatments, because I want to maintain my healthy alignment. I would recommend Atlas Orthogonal health-care with Dr. Maloof to anyone with health problems, or for prevention of health problems and illnesses.

Sincerely,
Jan Appling, "Patient" Atlanta, GA
