

My name is Bev and I'm sharing a story of hope and a new lease on life. I was a fibromyalgia sufferer for 20 years! I also had the long list of "sister" ailments that accompany fibro, i.e.: irritable bowel syndrome, migraines, fatigue, digestion problems, depression, and the never ending pain. I had long ago accepted that pain was just a part of my lot in life and something to be coped with daily. Over the years I had run the gamut of treatments, doctors who didn't know what to do with me, and had settled into the pattern of a chronic pain sufferer.

I was seeing a pain specialist and was receiving epidural cortisone injections every 2-3 months. They were painful but would temporarily give me relief from a pain level of 8-10 and reduce it to a "tolerable" 4-6. Acupuncture also gave temporary relief as did other types of chiropractic, physical therapy and drugs. I hated the medicine regime and the injections but saw no other working solutions for the long term.

Enter one Dr. Marion Maloof!! My sister told me about this man who could get rid of my fibro and my pain. I read his literature; thought it made some sense but was extremely skeptical based on past experiences. I really had nothing to lose, except my sister's gentle "nudges" and after meeting the doc at a networking meeting and seeing what a nice guy he was I decided to give Atlas Orthogonal, and him, a try. Doc got to hear my long, sad tale and listened very patiently, asked questions and showed *genuine concern* for me. WOW! He was already different from most of my encounters with doctors of any sort. He assured me that he COULD help me and that it would take some time to completely correct all the years of misalignment, but that it would happen if I would work with him. (I surprised him by responding quite rapidly and dramatically!)

After some x-rays and an exam he was ready to adjust me for the first time. At this point remember that I am experiencing a pain level of around 7-9, taking muscle relaxers, narcotic pain meds, anti-inflammatory meds, sleeping pills, anti-anxiety and anti-depressant meds and keeping ice packs as a close friend at the time of my first treatment. I was not expecting anything dramatic or miraculous but SURPRISE – that is what I received! After my first adjustment, which was completely painless and stressless, I sat up and had **NO PAIN**—that's right- **NO PAIN!!!!** I couldn't believe it!! I was almost in shock wondering what was happening in my body-I could feel dramatic changes going on. Within a few weeks I was holding my adjustments for several days, off of all the aforementioned drugs and so full of energy and enthusiasm that I was driving my family crazy-in a good way! Me, tired, dragging, in pain, they were used to dealing with. Me, energized, ready to walk, go places and skip naps (!), this they weren't sure how to handle at first! They soon adjusted and our life will never be the same again! I truly believe that God worked **through** Dr. Maloof to bring healing to my body. I have no more IBS, migraines, digestive ailments and I am losing weight!! I can not remember a time in my 40+ years that I ever felt this healthy! **Atlas Orthogonal WORKS!!!** I have had some rough days still, but they are few, far between and at the worst they would have been a "good" day

before Doc. I have new hopes, dreams and energies for the future that I would never have had with the track I was on previously.

Take it from a skeptic who has become a fanatical believer-this treatment **WORKS** and if you truly desire to get healthy **YOU CAN!!** Come with an open mind and an attitude to change your outlook on your life and see what amazing things can happen for you! I wish I had known about this years ago so that I could have experienced more health, but also so that I could share my story with many others who suffer from all types of chronic pain and health problems. It's not magic, it's not imaginary and it's a totally new approach to treating health issues-but **IT WORKS!!!** Have I mentioned that after 20 years of **constant** pain I was **PAIN FREE** after the first session?!! You have absolutely **NOTHING** to lose by trying this method and perhaps an entirely **NEW LIFE TO GAIN!!** So the ball is in your court-do you **REALLY** want to get out of pain? Take the next step and call Dr. Maloof today!

Doc-thank you for working with me, being patient, encouraging and positive. You and Rachel set a fantastic atmosphere of caring, concern and positive attitude that touches everyone who passes through your office. God bless you!

Bev Burris, Former Fibro Sufferer, Snellville, GA
