

My Story

My name is Lisa Feliz and for the past 7 years I have been suffering from scoliosis. I found out I had this irregular curve in my spine around the age of ten, in a visit to the emergency room. I finally had an answer to why I was in constant back pain and why i was able to carry no weight (like my book bag), and why certain sports caused me extreme pain. Through out the years I learne to carry out an as close to normal life with this pain.

As a result to the scoliosis, I ceased to grow early on, I suffered from ulcers, neck stiffness, depression, knee problems, anxiety, and many other related symptoms that normal teenagers shouldn't have! For about 3 years after finding out I had scoliosis, I would see a doctor about every 6 months to once a year where he examined my back. He would tell me, my back had neither progressed nor worsened, but he never took the pain away.

I was then sent to physical therapy after complaning a hundred times, where they put me through very painful excersises in hopes to correcting my back and taking away the pain. **WHAT WAS THAT FOR???!!!** The pain was just more agonizing than before after every session.

I then gave up. I came to the conclusion that there was no one that could help me, and I was just going have to have to live through the pain. As a pain reliever I would take Advil or muscle relaxers, anything that can help for a little. There were days I felt wonderful and could carry on a normal life like everyone else, but the days in which I suffered in pain were alot more. There were days I couldn.t even eat b/c the pain in my back had taken over my arms and it was difficult in getting the fork to my mouth!!!

And then one day I met Juan, He was a friend of the family and in a conversation he told me who he worked for and the experiences he had had. I found them too good to be true and for a long time I was afraid to go because I did not want to be disappointed again. Finally one day the pain was just tooooo much for me to handle, and i gave Juan a call. I asked him to set me up for the soonest appoinment they had available, and he reassured me that i would NEVER regret it..

When I came in for my consultation, I was in shock.. **HOW DID DR. MALOOF KNOW EVERYTHING I WAS GOING THROUGH?!!** It was unbeleivable to me, until I received my first adjustment. He took all the pain away, was correcting my back at the same time, and helped me feel like never before. He became my life long muscle/pain relaxer, his work is unforgettable and I will never forget how much he helped me. Word cannot express the feeling of not having pain, and having a normal life back.. Words cannot explain how grateful I am to you.

THANK YOU DR. MALOOF!!! THANK YOU!!

Thank You!
- Lisa Feliz
